

## BENZYL ALCOHOL (BOH)

As a representative of the largest and highest quality manufacturer in the world; TRI imports and stocks Benzyl Alcohol in warehouses across the United States. By working directly with the manufacturer we are able to provide competitive sourcing solutions.

### APPLICATIONS

Paints & Coatings  
Sealants & Adhesives  
Composites  
Elastomers  
Floor Coatings  
Epoxy Accelerator  
General Use Solvent

### CHEMICAL PROPERTIES

CAS No.: 100-51-6  
Formula: C<sub>7</sub>H<sub>8</sub>O  
Appearance: Clear, colorless liquid  
Purity: 99.6% Min. & 99.8% Min.

### Product Description

Benzyl Alcohol has strong polarity and limited water solubility. This makes it a useful solvent. It is used as a chemical intermediate because it easily reacts to form esters and other compounds. Additionally, it is used as a de-greasing agent in cleaners and also as a solvent for ink and coatings. As a reactive intermediate, it reacts quickly with various acids to form esters useful in the soap, perfume and flavor industries.

### Form & Appearance

Benzyl Alcohol is a clear colorless liquid with reactive methylene and nuclear hydrogen groups. As a primary alcohol, it has a mild aromatic odor.
